Dragados USA Safety, Health and Environmental Policy Statement

Dragados USA is aware of and committed to responding to the potential safety, health and environmental impacts resulting from its operations and activities. In keeping with Dragados USA policies, which are incorporated herein by reference, Dragados USA management will implement a Safety, Health and Environmental Management System to address these potential impacts and to carry out operations and activities in a manner that protects and safeguards human health and the environment.

This management system is designed to make safety, health and environmental care an integral part of all projects and the responsibility of all employees. It allocates appropriate resources and provides the training necessary to ensure the achievement of safety, health and environmental objectives. Senior Management at Dragados USA is committed to keeping this system active and effective and to continuously improve it as a framework to achieve the following results:

Regulatory Compliance

We will evaluate and comply with all applicable federal, state and local laws and regulations at each location where we conduct business.

Prevention of Accidents

We will strive to identify and assess risk in all of our activities and take actions to mitigate any high-risk conditions.

Prevention of Pollution

We will seek to cost effectively avoid the creation of pollution and waste from our projects and operations, and to manage waste through safe and responsible methods.

Conservation

We will strive to reduce our consumption of natural resources through cost-effective use of recycled and reused materials and conservation of energy and water.
Emissions and Effluents

We will work to diminish our emissions and effluents by employing proven cost-effective operational controls, by diligently monitoring operational indicators and by implementing corrective and preventive action where necessary.

Ecology and Habitat

We will protect habitats, wetlands and other sensitive ecological resources in accordance with applicable regulations and local ordinances.

Hazardous and Toxic Substances

We will exercise caution when using hazardous materials and avoid the use of toxic substances if unable to properly assess their human, ecological or environmental risks.

Communication

We will communicate this policy to all employees, make it available to the public and establish procedures to receive and respond to inquiries from the workforce and external interested parties. We will also alert potentially affected individuals and authorities of any safety, health or environmental incident(s) in a timely and effective manner. Thorough investigations will be conducted and corrective and preventive actions implemented and monitored. Dragados USA promotes the participation of its workers in its continuous improvement process.

Objectives

Every year, Top Management, in collaboration with the SHEMS team, will analyze the status of the system and establish objectives that will be reviewed periodically during the year.

Senior Management at Dragados USA believes that how we care for people and the environment today affects both current and future generations. We accept our responsibility for doing our best to maintain awareness and to minimize adverse safety, health and environmental impacts from our operations. This is beneficial for the environment in which we, our families and our neighbors work and live and for generating new opportunities for our business.

Sincerely,

Jose Luis Mendez Sanchez
President
